

Harrison Boettner

Senior Software Engineer

Austin, Texas · +1 612 616 2078 · hmbottner@hotmail.com · harrisonboettner.com · [LinkedIn](#) · [GitHub](#)

Senior software engineer building backend systems, security integrations, and applied AI products: early engineer at a SOAR startup through its acquisition by Arctic Wolf, now building identity security and AI capabilities at Reveal Security. Building and shipping software for 13 years, with 5+ years in professional SaaS and cybersecurity engineering; owns delivery end to end from architecture through production.

PATENT PENDING - REVEAL SECURITY, 2026

Trust Budget (co-inventor) - per-identity trust scoring that turns post-login behavioral anomalies into automated containment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java

Backend & Data: Node.js, NestJS, Express, PostgreSQL, Supabase, Redis, BullMQ, API integrations, data pipelines

Frontend: Next.js, React, Vue.js

Cloud & Systems: AWS, Docker, GitHub Actions, workflow automation, multi-tenancy, RBAC

AI & ML: PyTorch, TensorFlow, Hugging Face, LLM orchestration, model evaluation and scoring, pretrained model fine-tuning

EXPERIENCE

Reveal Security

Jun 2025 - Present

Senior Software Engineer

Recruited by Revelstoke's former CTO to develop security integrations and AI-powered capabilities.

- Lead integration architecture and development connecting customer environments to identity security analytics, including data pipelines and model inference orchestration.
- Partner with ML and AI teams to productionize LLM-powered capabilities and proprietary scoring systems; build backend services and UI with TypeScript, NestJS, Vue.js, and PostgreSQL.

Arctic Wolf

Nov 2023 - Jun 2025

Senior Developer / Developer

Joined through the Revelstoke acquisition; promoted to Senior Developer in Nov 2024.

- Led backend automation and integrations for Active Response from design through release, automating security response workflows and reducing manual work for customers.
- Mentored developers, owned pull request reviews across two repositories, and delivered full-stack features.

Revelstoke Security | acquired by Arctic Wolf

May 2021 - Nov 2023

Full Stack Engineer / Integration Engineering Intern

- Joined as an intern and converted to full time before graduation; among 10 employees retained from a team of 30 through the Arctic Wolf acquisition.
- Designed and implemented core data-engine and integration functionality for a SOAR platform with a unified data layer spanning more than 80 production integrations.

FOUNDING WORK

ParsePilot | parsepilot.ai | Co-founder & Lead Developer

May 2025 - Present

- Built a multi-tenant AI automation platform with agency and client workspaces, a visual workflow builder, execution monitoring, and human review queues.
- Implemented usage metering and Stripe billing using Next.js, React, TypeScript, Express, Supabase Postgres, Redis, BullMQ, and Docker.

Mosaic | Co-founder, Developer & Manager

- Contributed to development and managed product delivery for a React Native nutrition and activity tracking app with AI coaching, available on iOS and Android.

Lafellus | Co-founder & Developer

Jan 2023 - Feb 2024

- Fine-tuned pretrained Hugging Face models for AI-generated text detection using PyTorch and TensorFlow; pitched at ASU Venture Devils Demo Day and received a non-equity venture award in Apr 2023.

EDUCATION

Arizona State University | B.S. in Computer Science, Mathematics minor

Dec 2023
